

Elementary integrated Technology Lesson Plan

Subject Area: Math

Curriculum Specifics:

[CCSS.Math.Content.K.OA.A.2](#) Solve addition and subtraction word problems, and add and subtract within 10, e.g., by using objects or drawings to represent the problem.

[CCSS.Math.Content.K.OA.A.5](#) Fluently add and subtract within 5.

Lesson Objectives: The Students will use this app to practice and learn the basics of addition and subtraction. Students can work at their own speed and ability and move forward as needed.

Materials/Resources Needed: ipad, KG Math App and math manipulatives

Lesson:

Students will open their ipad to the KG Math app

Students will have available math manipulatives to help them compute.

The students will practice the addition problems going thru the process at least 5 times .

The students will then practice the subtraction problems at least 5 times.

Students can then select a challenge level if they have finished their work.
